

## March 2011 - NEWSLETTER

### Barpro Basics - Mobile Maintenance

Storax systems are designed to require the minimum of maintenance during their long lifetime.

However regular; planned maintenance ensures optimum efficiency and safety.

In the next couple of months, we'll have a look at maintenance under the following topics:

- General Housekeeping
- Electrical Maintenance
- Safety
- Mechanical Maintenance; and
- Training courses offered

Our focus will be on the various checks needed to keep your Storax System in good working order.

Should you like a detailed copy of the maintenance that should be done on your system, and how often; please contact Natasha or Cindy at 021 552 9190.

Using shrink wrap to maintain your system should not be an option.

### Storax Visits Barpro

Storax UK's Design Manager, Murray Knight recently visited Barpro Storage in Cape Town.

During his week long stay, Murray spent time in technical discussions with members of the Barpro Storage team and visited a number of completed stores in South Africa.

Murray was keen to emphasize that Storax Mobiles are machines that, like many other machines, will benefit from good care and maintenance.

He spent time in the Barpro Storage workshop and was impressed by the company's ability to produce, at short notice, most of the spare parts that would normally be required for maintenance and repair.

Murray Knight from  
Storax UK

### All hours Technical Assistance

Please note that all technical queries will now be handled through a dedicated all hours number.

★ (021) 552 - 9191 ★

This number is available to all our customers who may be experiencing technical difficulties so that they can be sorted out efficiently.

### Spalpro proves it's worth!

Last year, Yacoob Dhoda from Yacoob's Transport in Durban found the floor in his store was cracking, and needed some repair.

Spalpro being applied to floor

Mr Dhoda ordered Spalpro 2000 which repairs cracked floors. The floor is ready for use just after 30 minutes!

Mr Dhoda was quoted saying, "Spalpro works very well - it is a self-levelling product and I am very happy with it."

Should you like to order Spalpro, please contact Natasha at 021 552 9190 or [natasha@barpro.co.za](mailto:natasha@barpro.co.za)
