

Shelving & Cabinets

Sysco® products

Static shelving is a fine example of versatile archiving. Storage rooms, art storage, libraries, offices, Sysco® shelving is our storage chameleon.

In all its simplicity, Sysco® shelving is a high quality system. The steel uprights are designed in such a way that no extra finishing is required. Sysco shelving can be supplied in several colours, and in different styles: plain, or perforated with round or slotted holes.

Looking for a more high-end solution? Our Sysco® shelving can be configured with cladding on all sides, various accessories and doors, creating a truly personal storage solution.

Our static shelving products are widely used around the globe, amongst world players as well as local businesses, but why do these companies choose Bruynzeel? Simple, because we exceed our clients expectations both in service and high quality solutions.

Closed shelving

Sysco® uprights and shelves create a rigid shelving system. Available in a multitude of sizes and with individually configurable compartments a bespoke shelving system can easily be created. Whether you need one or multiple sections, Sysco® shelving has a solution.

Perforated shelving

Perforated shelving uses the same Sysco® uprights and shelves as the closed version. Though the uprights have a circular perforation that makes ventilation within the system possible.

A perforated shelving system has an open look and feel whilst maintaining the rigidity and loading capacity of a closed shelving system.

Slotted shelving

Slotted shelving uses the same Sysco® uprights and shelves as the closed version. Though the uprights have rectangular cut-outs which make ventilation within the system possible which creates a more open system. The slotted uprights are often used in libraries.

Open shelving

Sysco® Open uprights create a completely open system, allowing optimum ventilation. The open system grants you to store items larger than the compartment size. Having an open system gives you a clear overview of the objects that are stored.

Build to order

Do you need advice or want a tailor made design? Bruynzeel will help you to get the best possible solution for your storage challenge. With a dedicated account manager and our sales support team. Get in touch today without any further obligation.

Our systems are highly configurable, with various standard bay lengths and upright heights that can be configured in steps of 40 mm.

Need to build a solution around existing structural elements? You can!

All our steel products are 100% epoxy powder coated, preventing rust and corrosion. Using high quality materials our storage systems are all produced in our ISO certified factory in the Netherlands.

Sysco[®] Library

In our Sysco[®] product range we created a product specifically for libraries. With a high quality finish and specially designed accessories. Our Sysco[®] Library shelving systems uses a brace beam for strength. Traditionally shelving systems use cross bracing, but this would obstruct the view in a library. Bruynzeel is your partner for library shelving systems, for both static and mobile solutions.

Today's Library

More than just books

Today, both public and academic libraries are increasingly becoming vibrant. They are going beyond being places to merely access knowledge, to become centres to truly explore and create. This stresses the demand for increased and improved services and hence the demand for more space.

It has never been more vital to ensure libraries offer an appropriate balance of flexible and special-use spaces to spur dialogue and engagement. Along with responding to changes dictated by technological advances, libraries must also offer appropriate spaces for meetings, presentations and casual collaborations. With a little help of Bruynzeel Storage Systems, libraries are easily able to create more space for all these kind of community needs by the aid of a new storage and display strategy.

We can eliminate or reduce your need for more space in public areas or your need for non-public archiving and/or extra building space and enhance internal workflow, efficiency and logistics.

Why choose a four post system?

As a four post system, Bruynzeels Sysco® Library is much more affordable compared to cantilever systems. In most cases you can save up to 35% compared to equivalent cantilever. Besides that, a four post system has no central spine and thus no wasted space.

Bruynzeels Sysco® Library has a wide range of accessories and is available in several different finishes to complement any library's interior design.

Doors & Cabinets

Bruynzeel offers a wide range of doors for our static Sysco® shelving and our mobile Compactus@ XTR shelving, but also our dust resistant stand-alone 561-cabinet. The Sysco® shelving can be fitted with cladding on all sides. You can either create an open system with wooden cladding or create a closed cabinet with various types of doors.

All our doors and our 561-cabinet are customizable in dimension and colour and has a selection of accessories and finishing, all to adapt them for their purpose or environment.

Sliding doors

Creating a cabinet out of our Sysco® racks can be done by using sliding doors. The doors are lockable and available in multiple wood designs

Hinged doors

Our steel hinged doors can be applied on both our static Sysco® shelving or on our mobile shelving system Compactus® XTR. The hinged doors are available in steel, steel with perforation and steel with safety glass panel. Available in almost any RAL colour you can match the shelving system or be creative and create something unique. The cabinet with the lockable steel hinged doors can be fixed to the wall to offer optimal safety.

561-cabinet

The stand-alone 561 cabinet is a dust-resistant cabinet containing hinged doors, either in steel or steel with safety glass panels. It can be fixed to a wall, and contains a 3 point lock in order to provide optimal safety for your collections and users. The cabinet provides safe storage for materials such as artefacts, medical equipment, and retail goods, among others.

Mobile shelving

Optimise space!

Mobile shelving is far more space-efficient than conventional static shelving.

Sometimes called a moving-aisle system, the single access aisle is 'created' wherever it is required by moving the mobile book-stacks aside, either individually or all at the same time. Our mobile systems can be equipped with extra wide aisles to allow wheelchair access, and additional innovative features such as Auto Air Circulation to preserve books and security options.

An increasing number of mobile units have been installed in the public areas of libraries, thanks to their enviable safety record and space-saving features.

Compactus® Series

Bruynzeel's Compactus® series is more than just a space-saving solution; the different systems are extremely easy to operate. Compactus® can be supplied with two different types of drive systems:

Compactus® Original: designed with convenience in mind.

Rotating the ergonomic operating handle provides swift and easy access to your collection. Select from an extensive range of finish options, from cost-effective chain box covers to eye-catching coloured glass.

Compactus® Dynamic II: optimum ease of use

Thanks to the electronic control system, Compactus® Dynamic II units are easy to operate and effortless to move, even with your hands full.

If electronics make our daily lives a little easier, why settle for anything less at work?

Creating space for a healthy planet

In a world where space is a scarce and a valuable asset, we dedicate ourselves to help organizations worldwide to use space in the most efficient and effective way to preserve their valuable documents and collections. As the footprint reduction company we achieve this by providing space creating solutions that contributes to a sustainable planet.

The use of our space creating solutions reduces the footprint of storage and with that the use of natural resources. We call this: creating space for a healthy planet

By applying Bruynzeel's space creating solution, our customers can achieve:

- Quadruple storage capacity or reduce up to 75% of the physical footprint needed for storage
- A reduction of the amount of building materials used up to 54%
- Savings up to 50% on energy costs to heat & cool their buildings
- Savings up to 90% on energy costs for lighting through efficient aisle lighting
- A reduction of the amount of security measures needed due to integrated access control functionality
- An increase in the wellbeing of staff due to innovative solutions with the highest level of safety included

This makes every space creating solution by Bruynzeel, by definition, a sustainable choice.

Bruynzeel's strategic objective is however to be the world's most environmental friendly provider of space creating solutions. To achieve that objective we are continuously working on reducing our own footprint and thus contributing to a sustainable planet.

We produce sustainably

Initiatives taken towards our road to NetZero 2045:

- Our own business operations are climate neutral as from June 1st 2021. We procure local green electricity from local solar and wind installations (= Scope 2) and green gas from local digesting installations (= Scope 1) for all our emissions at our headquarters and production site in Panningen.
- We apply best practices in energy and water stewardship. Combined with attention to material health this supports a sustainable planet as well as the wellbeing of every individual using our solutions.
- We are able to use Green steel specifically to order for Sysco® shelves and uprigts which is already >50% of our steel used.
- Our production method of using non-galvanized and uncoiled material is unique in our industry. By using uncoiled and bare steel instead of galvanized steel, Bruynzeel contributes to a better environment and saves:

	Yearly saving	Saving per shelf meter
 CO ₂ saving	2.108.000 kg  476 cars driven for one year	1,41 kg  190 smartphone charges
 Water saving	25.097 m³  Drinking water for 34.380 people	16 L  Flushing the toilet 5 times
 Waste saving	96,52 m³	-
 Chemicals saving	15.216 L	-

Choosing quality With a sustainable touch

Choosing Bruynzeel means quality is guaranteed. To make sure you get the best possible storage system our products comply with recognised international quality standards, awarded by independent experts in the field. The RAL certificates awarded for our products are your guarantee for performance and reliability.

Your storage solution is made in our factory in the Netherlands, according to ISO 9001 and ISO 14001. World-class manufacturing tools and methods implemented in our facilities allow us to produce your order with great precision in thousands of different configurations. We use mainly oil-free steel to minimise our impact on the environment by eliminating the need for detergents and cleaners. Our powder coating process guarantees a 100% coating with epoxy powder, so no corrosion can occur.

We would be delighted to assist you in achieving your sustainability goals by offering you durable products and space-saving concepts.

Exceeding expectations in service

Every Bruynzeel Storage solution comes with top-notch technical support. We go the extra mile to make sure you get the most out of your Bruynzeel system.

Expert advice

Get the rundown on all the dos and don'ts of your system from a Bruynzeel service engineer in training groups of up to eight users.

Key User training

Make the most of your storage solution by designating a "Key User", trained and supported by Bruynzeel. If further assistance is needed the Key User can directly contact our service staff.

Service contracts

For ultimate peace of mind we offer a range of service contracts, covering parts, labour and callout charges.

A Bruynzeel service contract guarantees your premium storage solution will receive the very best care from trained service engineers. Our star services are carried out by dedicated staff who take pride in the upkeep and maintenance of your system throughout its lifetime.

The power of partnership

Finding efficient and sustainable storage solutions for your storage challenge requires careful consultation and is the key to designing a tailored solution that matches your needs.

Every Bruynzeel storage solution is unique and based on your specific requirements. In close cooperation with you, we create the relevant storage solution for the proper care and management of your collection.

Because we have our own Research & Development department and an experienced team, we are able to adapt our products to your requirements and market trends.

Nothing is impossible. We can design a storage system for any need. Our staff are expert at providing customised storage solutions.
