Welcome to stow Group.

With **over 45 years of expertise**, stow Group is a powerful, global leader in racking and automated storage solutions, helping businesses optimize their warehouse operations with cutting-edge technology. Our commitment to innovation, quality, and efficiency drives everything we do—from designing and manufacturing to installing top-tier storage systems.

With a strong international presence, we operate nine production sites across Europe and employ **over 2,000 experts worldwide**. Under the stow Group umbrella, our two independent brands—**stow and Movu Robotics**—deliver tailored storage and automation solutions to meet the evolving demands of modern logistics.

Why choose us?

At stow, we specialize in providing innovative, customizable storage solutions designed to revolutionize your warehouse efficiency. Our technology ensures seamless integration into your workflow, unlocking unparalleled productivity and space utilization.

Our **Mobile Racking Systems** elevate storage capabilities by increasing space **efficiency by up to 90%** while reducing operational costs.

brand

Transform your warehouse with our cutting-edge Mobile Racking solutions. ■

Our flagship mobile racking solution combines maximum storage density with full accessibility, making it the ideal choice for dynamic warehouse environments. The stow Mobile system is composed of conventional pallet racking installed on mobile bases. This versatile setup allows opening and closing of the aisles. The solution enables compact storage while keeping each individual pallet accessible.

Key features include:

Compact storage with full accessibility: Adjust aisles manually or automatically, ensuring rapid access to individual pallets.

Cost savings: Cut down on lighting, heating, and cooling expenses, especially valuable for cold storage facilities.

Flexibility and compatibility: Adaptable for various pallet sizes, weights, and storage needs, ensuring future scalability.

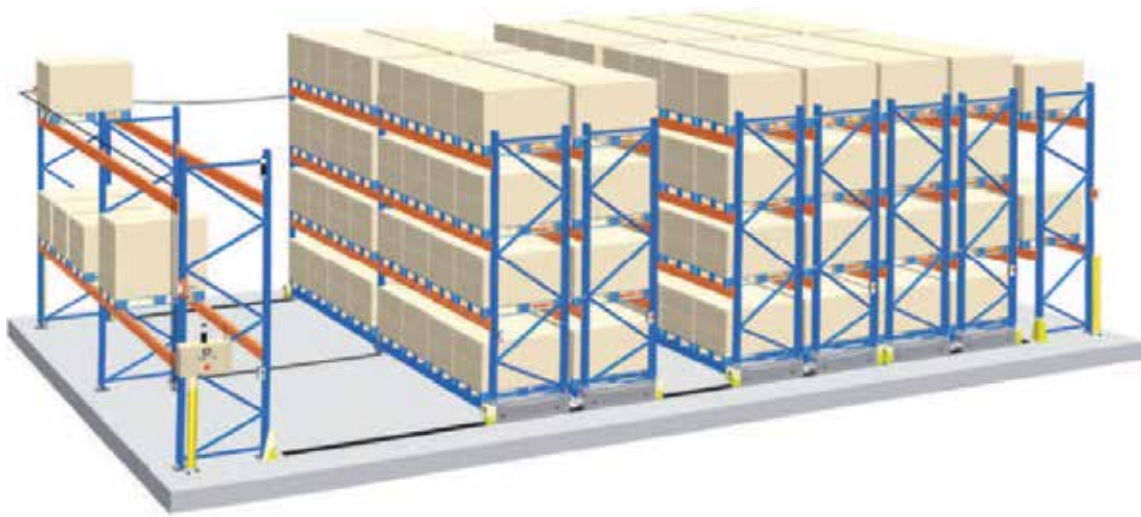

Advanced safety features: Photoelectric beams and personal detection systems ensure the highest operator safety standards.

With **many installations worldwide**, stow Mobile is trusted by industry leaders for its unmatched reliability and ease of use. Whether you're scaling a large logistics hub or optimizing existing operations, our systems are designed to deliver measurable improvements.

Integrated software 'MobileConnect'

With MobileConnect installed at the your premises, stow can remotely access and monitor the mobile racking system without needing to visit the site. This allows us to perform software updates and upgrades remotely, ensuring the system always operates on the latest firmware with up-to-date bug fixes and enhanced functionalities.

In the event of a failure, stow's experts conduct a thorough analysis to identify the root cause, ensuring that any required on-site intervention is resolved efficiently and correctly the first time.

Features you'll love

When it comes to efficiency and reliability, our product is designed to meet the highest standards in the industry. Explore the standout features below to see how it can transform your operations and provide unparalleled performance.

- **Smart Lighting Controls:** Only lights open aisles to save energy.
- **Standard Comfort features:** Aisle lighting outputs, multi aisle, fire position, night mode & comprehensive HMI with extensive diagnostics.
- **Maintenance & Support:** Troubleshooting made simple with remote diagnostics and worldwide aftersales support.
- **High Flexibility:** Standard frame sizes include 800–900–1000–1100–1250–1500mm with high flexibility in frame spacing for all pallet needs.
- **Custom Options Available:** Tailor the system to your specific requirements with decking options, double-sided operations, and forklift integration .

With stow Mobile Racking, every feature is designed to maximize your storage potential.

How we work

Our process is designed with your operational goals in mind:

- **Consultation:** We assess your warehouse space and operational requirements to ensure the perfect solution for your business.
- **Design & Planning:** Using advanced computer-aided design technology, we meticulously engineer your system to meet your unique needs while optimizing space and efficiency.
- **Installation:** Our expert team installs the system with precision, minimizing disruption to your operations and ensuring a seamless transition.
- **Ongoing Support:** Enjoy peace of mind with access to remote diagnostics and servicing, ensuring your system delivers consistent performance. Our plug-and-play setup also allows for seamless future expansions, so your system evolves as your business grows.

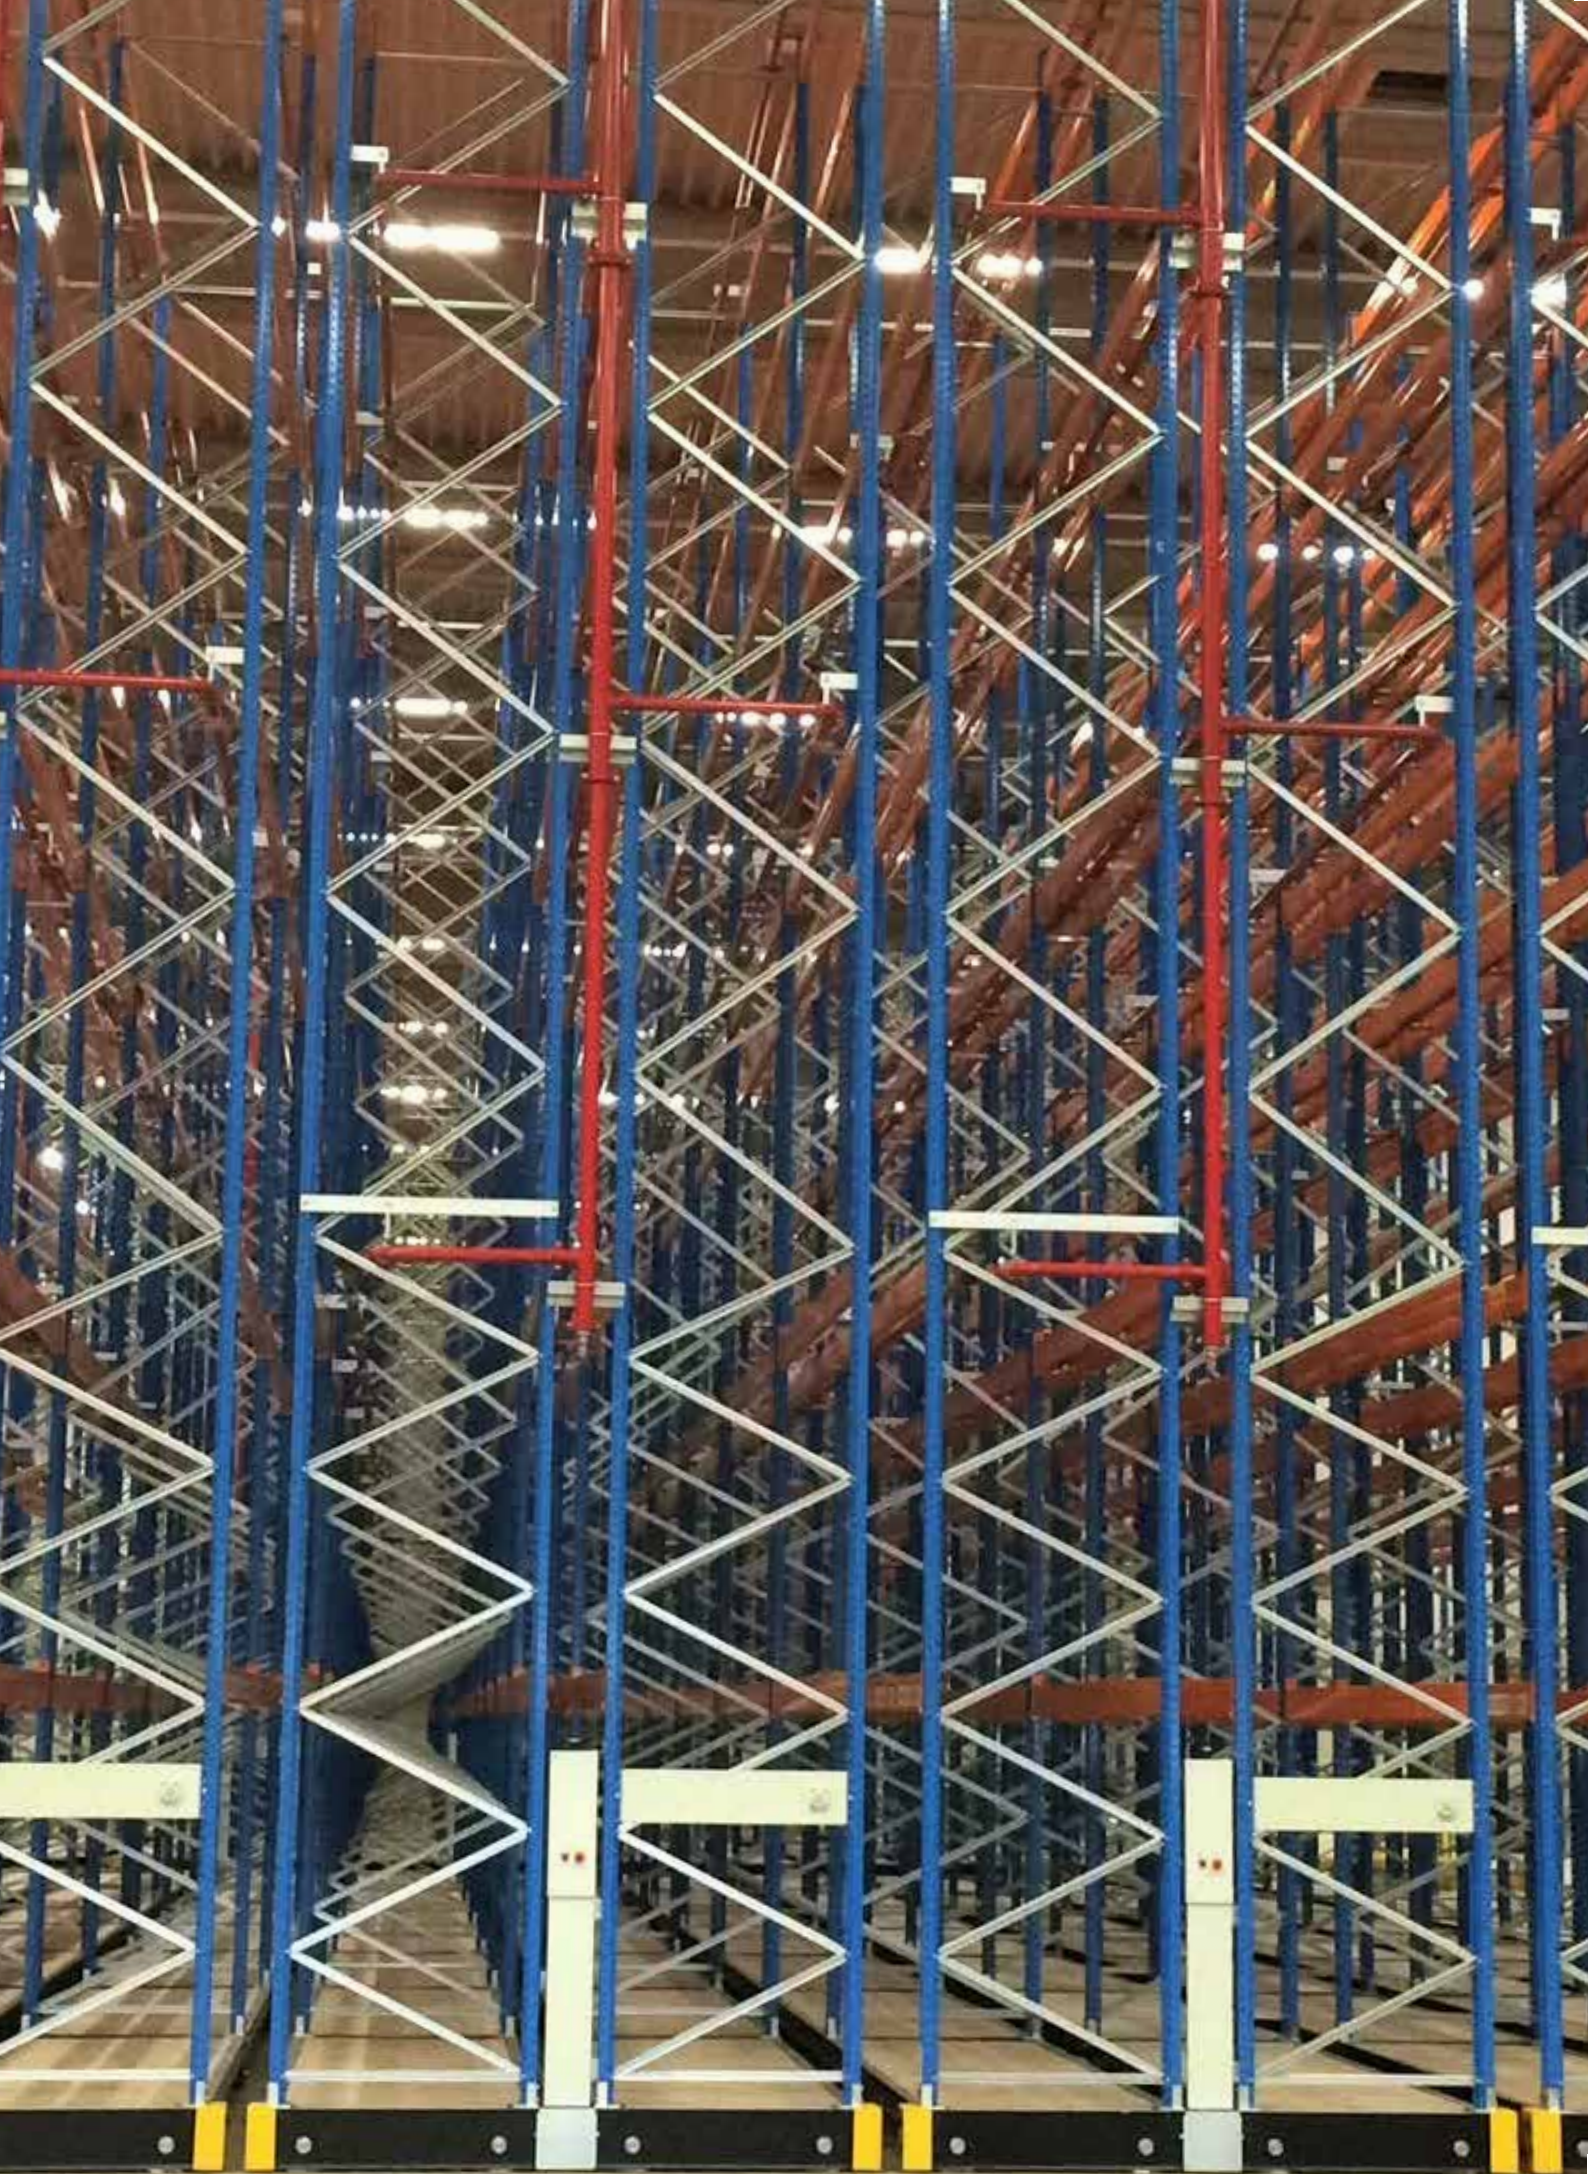

stow Rack Stories

Discover our stow Mobile racking case studies

In addition to several successful mobile installations, stow installed in 2024 the largest mobile racking installation in Northern Europe. Spanning 36.000 m², the innovative cold storage hub for Frigoscandia in Hyllinge, Sweden is designed to handle diverse temperature requirements for food logistics, including frozen, chilled, and ambient zones.
